

Typical Pain Points in Enterprise Office

Slow contract signing, cumbersome approvals, difficult HR document management

Long Contract Signing Cycles

Printing, courier, signing, and return mailing add many steps — slowing business progress.

Cumbersome Approval Processes

Approval documents require layer-by-layer signatures. Paper routing is slow and hard to track.

Difficult HR Document Management

Onboarding, exit, and transfer documents need signatures and archiving — paper takes space and is hard to retrieve.

Hanvon Signpad Enterprise Office E-Signature Solution

Original handwriting signatures + electronic archiving for more efficient office approvals

1

Business System Calls Signature Control

OA, contract, and HR systems call the signature control via SDK, quickly integrating e-signature capability.

2

Employee Signs on the Pad

Employee or client completes original handwriting signature on the pad, displayed synchronously for confirmation.

3

Signature & Document Synthesis

Original handwriting signature and electronic contract or approval form are synthesized into a tamper-proof PDF/OFD file, encrypted for transmission.

4

Automatic Return & Archiving

Electronic documents are automatically returned to the business system for archiving, supporting fast search and retrieval.

Recommended Products

Choose the right model based on your office scenario
