

# Healthcare / Social Security Signing Solution

## Typical Pain Points in Healthcare / Social Security

Difficult patient signature retention, cumbersome consent form management, inconvenient archive retrieval

### Difficult Patient Signature Retention

Registration, payment, and informed consent require patient signatures — paper signatures are hard to retain long-term.

### Cumbersome Consent Form Management

Informed consent forms require printing, signing, scanning, and archiving — cumbersome process, low efficiency.

### Inconvenient Archive Retrieval

Paper medical record retrieval is inefficient and cannot quickly respond to medical disputes and audits.

## Hanvon Signpad Healthcare / Social Security Solution

Original handwriting signatures + electronic archiving, meeting medical compliance and archive management requirements

1

### Business System Calls Signature Control

HIS and social security systems call the signature control via SDK, quickly integrating e-signature capability.

2

### Patient / Citizen Signs on the Pad

Patient or citizen completes original handwriting signature on the pad, displayed synchronously for confirmation.

3

### Signature & Consent Form Synthesis

Original handwriting signature and electronic consent form are synthesized into a tamper-proof PDF/OFD file, encrypted for transmission.

4

### Automatic Return & Archiving

Electronic documents are automatically returned to the business system for archiving, supporting fast search and retrieval.

# Recommended Products

Choose the right model based on healthcare / social security scenarios

## ESP560

5.6" Electronic Signature Pad

5.6-inch color LCD, compact design for space-limited counters.

- 5.6"
